Find the knot. Watch it click.

FREE · LIVE NOW

WAIT... WHAT?

You revised it six times. Still wrong?

That's not a memory problem. It's a **knot**: one wrong idea that keeps breaking your answers.

Find the knot. Watch it click.

unravix.tech

WHAT IS UNRAVIX?

AI search hands you an answer.

Unravix finds the wrong idea behind yours.

ANSWER APPS

“Here's the answer.”

You copy it. The wrong idea in your head stays exactly where it was.

✗

UNRAVIX

“What do you think happens?”

It finds the exact misconception, untangles it, then checks it actually clicked.

✓

Every subject, every level: **Class 1 to PhD**, entrance exams and job interviews. Free, in your browser. No login needed to ask.

HOW IT WORKS

Stuck → clicked in 3 moves.

01

Guess first

Ask by typing, talking or snapping a photo. Before any explanation, you answer one quick question. Your pick shows Unravix where you are.

02

Find the knot

Unravix names the wrong belief behind your doubt, then explains it starting from *that* belief, plus an analogy you'll remember.

03

Prove it clicked

A brand-new question tests the same idea. Miss it? You get a fresh angle, not the same words again.

Or start with a free **8-question Knot Scan** and get your Trap Report.

IT CLICKED

TRY A REAL KNOT

A classic kinematics trap.

Physics · Kinematics | JEE · NEET

A ball thrown up reaches its highest point. Its acceleration there is:

- A · Zero — the trap
- B · g downward ✓
- C · g upward

KNOT FOUND

THE KNOT

“v = 0 means a = 0”

The click: gravity never switches off. v = 0 for an instant, but v is still changing at 9.8 m/s² downward.

Now prove it: a stone is dropped from a cliff. What is its acceleration halfway down? (Answer: still 9.8 m/s² downward.)

Picked A? That's the knot. It's one of 42 hand-written knots in the Unravix library, each with a probe like this one.

WHAT'S INSIDE

All free. Live now.

8Q
Knot Scan

8 quick questions for your level, then a Trap Report of what tripped you.

🎙 📷

Ask anything

Type it, say it or snap a photo. No login.

Receipts on every answer

A second AI from a different family fact-checks each answer: **Verified** or **Needs review**. Spot a mistake? Tap **"This looks wrong"**.

329
Knot Library

Common traps for 329 levels in 23 categories.

198
Country catalog

Boards and exams for 198 countries.

Forums

22 rooms by subject and exam. Every post screened by AI before it goes live.

Your Confusion Graph

Watch your knots go from tangled to untied. Light or dark mode.

WHY NOT JUST ASK A CHATBOT?

AI chat vs Unravix

BRAIN.EXE RESTARTED

	ANSWER-FIRST CHAT	UNRAVIX
Starts with	~~your question~~	your guess
Shows you	~~an answer~~	the wrong idea behind yours
Explains from	~~the right answer~~	what you actually believe
Then	~~you move on~~	a new question tests the same idea
Still stuck?	~~a reworded answer~~	a whole new angle
Fact-check	~~no visible check~~	second AI + Verified badge

Why guess first? Learning research shows that attempting an answer, even a wrong one, makes the explanation that follows stick better. And seeing your own idea fail is what makes room for the right one.

WHO IT'S FOR

Anyone who's ever said “I get it... wait, no.”

Students

Find the traps before your exam does. Scan your level, fix one knot at a time, and see your map untangle.

Teachers

Open a lesson with a Knot Scan to surface the misconceptions in the room, and point students to the Knot Library for the chapter.

300+ EXAMS, COURSES AND JOB ROLES, OR TYPE YOUR OWN

Class 1–5 · Class 6–10 · Boards · JEE · NEET · GATE · CUET · CLAT · CAT · UPSC · SSC · Banking · SAT · AP · IB · A-Levels · GCSE · IELTS · GRE/GMAT · Undergrad · PhD · Coding interviews · Aptitude

Class 1 → PhD
plus job interviews

329
levels to pick from

198
countries

Built for every country. Launching with JEE, NEET and GATE in India, and built for SAT, IB, A-Levels and more too.

YOUR FIRST KNOT IS WAITING

Scan it.
Find it. Untie it.
